A compact workhorse for the busy workplace

The SP C360DNw and SP C360SFNw are LED printers that combine quality, speed and reliability with modern workflow capabilities, making them ideal for small to medium businesses and small workgroups.

Featuring an easy-to-use setup wizard and convenient WIFI connectivity, the models are easy to install, ensuring that you can start using the wide range of productivity features on offer, such as double-sided scanning, almost instantly to save time and boost productivity.

Both models offer advanced security with Locked Print to protect confidential documents from unauthorised viewing. Additionally, these printers are eco-friendly with low typical electricity consumption (TEC) values and minimal power consumption in Sleep Mode.

- The SP C360DNw comes with a tiltable 4-line LCD panel for easy viewing and navigation.
- The SP C360SFNw comes with an intuitive 7" Smart Operation Panel, which provides both ease-of-use and opens up a world of additional functionality.

Working smart has never been simpler

Speed and clarity meets light and compact

- These LED printers can print 1,200 dpi quality documents at 600 dpi speed, enabling you to produce sharper and higher quality documents in a shorter amount of time.
- Because LED technology uses less components to print, these printers are smaller and lighter, making them suitable for a variety of businesses and small spaces.
- Fast print speeds of up to 30ppm and quick first print time of 7.2 seconds (Black and White) and 8.6 seconds (Full Colour) translates into high productivity.

Functionality at your fingertips

- Intuitive operating concept with the tiltable 4-line LCD Display (SP C360DNw) offers an at-a-glance view of useful functions such as network and remaining toner status.
- The 7" touch panel interface (SP C360SFNw) provides you with a full touch screen experience and variety of applications that help you in your business.
- Single Pass Document Feeder with ID card copy/scan functionality allows fast double-sided scanning.
- Carrier Sheet allows easy scanning of irregular-shaped, lightweight, fragile and wrinkled documents with accurate double-sided copying capability.

Security and Ease of use

- Both the SP C360DNw / SP C360SFNw come with a set-up wizard that cuts out the need to navigate complex processes.
- Convenient wireless connectivity enables you to set up and use the printers with "Plug & Play-like" simplicity.
- Protect confidential documents from unauthorised viewing with Locked Print, which requires you to enter a password on the operation panel before printing.

Seamless Connectivity

- Print on the go from your smart devices - phone, tablet, and notebook with Apple AirPrint®, Mopria® and RICOH Smart Device Connector Smart Device Connector.
- Print directly from USB using the built-in slots without the need to use a computer.
- Gain quick access to the printers via the embedded NFC tag or tap on WIFI Direct without connecting to the corporate network.
