Brilliant Everyday Colour

Color printing has never been so easy and affordable with compact and seamlessly connected desktop devices, putting colour within easy reach.

Impressive Quality and Performance

Perfect for small offices with demanding print requirements, RICOH P C300W and M C250FWB help to save space without compromising on quality or performance. To keep pace with demand, vibrant colour and black-and-white output is delivered at up to 25 pages per minute.

Productive Time-Saving Features

To simplify your print environment, Ricoh offers single and multi-function versions of the same advanced print engine. RICOH M C250FWB is a compact fax-enabled 4-in-1 MFP. Its large colour touchscreen panel simplifies operation and to ensure time saving, the integral Single Pass Document Feeder (SPDF) quickly scans double-sided originals in a single pass. The addition of an optional second paper tray expands capacity and enables different sizes and types of paper to be held inline, ready for use.

Easy Mobile and Wi-Fi Interaction

Regardless of what your print environment is, RICOH P C300W and M C250FWB will fit the bill. They support Windows, Mac, Linux, and with AirPrint, Mopria and Google Cloud Print standard features, it is simple to print from and scan to smartphones and tablets. Furthermore, with Wi-Fi Direct and Near Field Communication (NFC) built-in, joining a network is as easy as a tap and go.

Security in our DNA

Recognising modern business security challenges, RICOH P C300W and M C250FWB ensure business information remains secure with robust security layers in place. Manage your confidential documents with the Locked Print function and only release when authentication is done at the device. Network encryption ensures data transmission remains safe.
