Let's make your print infrastructure a gateway to your digital workspace

As workstyles evolve, digitalisation, and agility are essential for your organisation to remain competitive. The new Ricoh IM C Series unlock the value of your print infrastructure with tailored, managed solutions which empower your people, improve efficiency, reduce cost, enhance security and drive sustainability. Innovatively designed, the IM C Series seamlessly integrate with cloud services and offer high-quality print, scanning and workflow automation.

Achieve your sustainability goals

A carbon neutral future

The IM C Series significantly reduces energy consumption and paper consumption by digitising workflows through scanning; helping to reduce your carbon footprint and costs.

More recycled plastic

Designed for sustainability across its lifecycle, the IM C Series is made using 50% post-consumer recycled plastic while PET toner bottles are produced from 100% recycled plastic. Plastic packaging is reduced by 54% thanks to a more sustainable material and no excess packaging.

Secure and efficient

Ongoing security

RICOH Always Current Technology provides security updates automatically. New security tools include WPA3 authentication for wireless encryption and the latest hardware security module. You can also restrict networks by port name and protocol as well as IP address.

Multi-Factor Authentication

Multi-Factor Authentication, including new card-based access to our printing devices, to minimise the risk of data breaches.

Improved admin management system

Privileged admin account control with unlimited MFP administrator accounts and customisable permissions. This eliminates risks related to sharing IDs and can be linked to user ID systems including Windows and LDAP platforms.

More energy savings

The IM C Series boasts industry-leading low TEC values and automatic eco-mode energy saving (0.3W) when in sleep mode. An innovative new toner that fuses at a lower temperature, resulting in the ideal sustainability at its core.

Enhanced productivity and seamless employee experience

Third-generation Smart Operation Panel

The new Smart Operation Panel has been upgraded for an even more intuitive and enjoyable experience. Brightness, touch sensitivity and position detection have been improved for optimal access to the device's resources and functions.

Improved user experience

- Android OS 10 for better security and usability
- Faster CPU, high RAM memory and enhanced performance
- Enhanced accessibility to device, tiltable for better visibility & new capacitive touch sensor
- Fast wake up time from sleep mode

Efficiencies in paper handling

New peripherals ensure professional results with automated finishing possibilities. The SPDF capably handles high volumes, special paper and card types. High-end options include a hybrid and booklet finisher for that extra touch.

Supporting your entire digital journey now and into the future

Scanning and automation

Scanning creates digitised documents that can automate processes like invoice and contract management. Uploading documents into your systems for archiving or as part of a workflow is now simpler with Ricoh's software.

Document management storage

Our scalable document management applications drive significant cost savings alongside process improvements. By taking print to the cloud, you can set location-aware printers and enable users to print anytime, anywhere.

Transitioning to the cloud

Our cloud software solutions are easy to integrate with your existing IT infrastructure, allowing you to enhance the capabilities of your print device. You can also securely connect mobile devices to carry out tasks from your phone or tablet.
